

**Office of Regulatory Staff
New Nuclear Development Update Report
V.C. Summer Units 2 & 3**

During the week of August 27, 2018, Office of Regulatory Staff – New Nuclear Development personnel (NND Personnel) worked at the VC Summer site on Thursday.

On Thursday August 30, NND Personnel attended the Plan of the Day meeting which focused on safety, SCE&G security and demobilization/abandonment of the site. The following activities were discussed:

- The SCE&G contractor continues to perform maintenance on storm water basins and evaluate closure of storm water permits.
- Craft labor completed reorganizing the laydown yards to consolidate plant material.
- Craft labor completed moving all plant equipment from the Blythewood warehouse to the VC Summer site.
- Craft labor are returning all excess SCE&G vehicles to SCE&G.
- All Hazmat material has been removed from the site.
- SCE&G's transfer of plant equipment to Santee Cooper is still under review.

Fluor personnel are on site supporting the Santee Cooper maintenance, preservation and documentation program. The maintenance, preservation and documentation program supports the maintenance of high value equipment (e.g., reactor coolant pumps, steam generators, pressurizers, reactor vessels and integrated head packages) on the VC Summer Units 2 & 3 site for future re-sale.
